

Environmental Policy

The prosperity and security of Enviroflo Ltd, together with everyone associated with it, ultimately depends on its ability to provide goods and services within an environmentally sound framework.

To achieve this consistently and efficiently, we operate an Environmental Management System which meets the requirements of BS 9001:2000 and covers all our operations.

It is the policy of Enviroflo to:

- Minimise waste and the consumption of resources (materials, fuel and energy).
- Foster a sense of responsibility for the environment amongst all our employees.
- Assess, monitor and where possible to reduce to a minimum the impact of our activities on the local and general environment, in consultation with Public Authorities where required.
- Ensure unavoidable waste is, where possible, re-cycled or is disposed of responsibly.
- Minimise the environmental effects of raw materials sourcing by evaluating the probity of our suppliers.
- Ensure our systems are able to detect and prevent accidental emissions or discharges and prevent pollution.
- Reduce the environmental effects of new developments through strategic evaluation and planning.
- Set environmental objectives and targets and publish them in Hydro-Flo promotional literature.
- Maintain a system to detect deviations from our stated policy, objectives and targets and to respond with the appropriate corrective actions.
- Advise our customers where appropriate on the best environmental practices associated with the use and disposal of our products.
- Continually strive to improve our environmental performance.

- Ensure that the management, staff and sub contractors all act in accordance with this policy and with our Environmental Management System which complies with the requirements of BS 9001:2000
- To comply with relevant environmental legislation and regulations and with any other requirements to which we subscribe.
